Jack Hammer 100

Industrial Strength Concrete Equipment Cleaner

Description:

Jack Hammer 100 is a unique product that dissolves concrete from concrete boom pumps, line trucks, portable concrete pumps, construction equipment, hand tools, industrial treatment systems and for a number of other applications. Jack Hammer 100 is an ideal product for concrete contractors, Ready-Mix contractors, and pool and sidewalk contractors and provides quick, easy clean-up from messy concrete.

Advantages:

- *Biodegradable and low toxicity, provides for safe handling*
- *No muriatic acid or other strong acids that will attack metal*
- *Attacks portland in cement and completely dissolves the hardened molecular structure back to mud*
- *Does not harm paint or produce fumes*

Directions:

Jack Hammer is best when used full strength. Spray Jack Hammer with a light coating and wait for 20 minutes. Follow up with a high pressure wash. If concrete has a heavy buildup, keep spraying until all concrete has been dissolved. Repeat process in 20 minute intervals as needed. If gray film appears, just re-wet and rinse again after 20 minutes.

As with any chemical, always protect yourself. Always use gloves, goggles, and protective wear.

Packaging:

5 gallon pails / 55 gallon drums / 275 gallon totes
